QUICKSCANTM I 2200 SERIES ODATALOGIC

Entry-level handheld imagers for corded applications using 1D barcodes

TAILORED LINEAR IMAGING TECHNOLOGY

Today there is an increased trend towards 2D bar codes, however, linear bar codes are still widespread in Retail POS checkout applications. Long bar codes are also commonly used in a variety of applications including utility bills, document processing and packaging. These long barcodes are a challenge for full area imagers to read due to their narrow field-of-view and shorter depth-of-field.

THE MOST PROMPT RESPONSE AT THE POS CHECK-OUT

The QuickScan QD2200 imager is the 1D entry-level corded imager from Datalogic with a superior scanning performance in its category. It reliably reads any type of 1D barcode from up close to a distance with ease in capturing long bar codes.

Unlike other devices on the market, this imager provides full control to the operator, from the linear aiming to the most prompt visual and audible good-read feedback. It seamlessly reads through plexiglass barriers and can scan electronic coupons from smartphone screens at an incredibly affordable price.

COMFORT AND RELIABILITY

Lightweight and easy to handle, the QuickScan QD2200 is very responsive at the pull of the trigger, providing a superior robustness for this class of products where the device is mostly stressed, because of the accurate design and quality of parts.

Offering simple configuration and ease of use, this robust entry-level scanner delivers continuous operation capabilities with no failures.

Finally, the QuickScan QD2200 imager will prove to be the best longterm choice, by cutting down-time, no read/misread management time, and service costs.
